RE: Reclamation of Drill Holes, EXP/049/018, M/049/004 - Powell
Mine, and M/045/006 - Five Mile Pass Mine

I called Lance Jackson of Interstate Brick yesterday in regard to Interstate Bricks 1987 drilling program. He said that they reclaimed all the holes except for those at Five Mile which they will reclaim this spring. Reclamation consisted of pushing the cuttings back down the holes, plugging with a five foot cement cap, and raking seed into the disturbed pad area.

The submittal of a MR-9 completion form will not be required since written approval was never sent to Interstate Brick.
